

Chanelle Menefee

Port of Corpus Christi

Chanelle Menefee is a Business Systems Analyst at Port Corpus Christi, where she has designed and built business applications since joining the organization in 2023. She owns the full development lifecycle, from requirements and data architecture through deployment and ongoing support and maintains a portfolio of integrated applications. Her current work includes the Port's ICS-214 Activity Log application, which digitizes ICS-214 activities, approvals, and personnel activations. Chanelle holds a Master of Science in Management Information Systems.
