

Derek Engle

dss + Consultants

Derek is a licensed engineer with nearly 20 years of experience conducting fire protection, accident investigation and quantitative risk analyses. He has experience conducting fire, explosion, and toxic gas dispersion risk assessments for commercial and industrial facilities in various industries, including maritime, oil and gas, refrigeration and dust processing. He has also conducted several technical research projects for industry committees including the NFPA.

He currently supports clients by performing Preliminary and Existing Hazard Assessments, Safety Certification, post-incident accident investigations and Fire-Life Safety Risk Assessments.
