

Ryan McClain

Port of Corpus Christi

Ryan McClain serves as GIS Manager at Port Corpus Christi, where he has led the Geospatial Intelligence and Remote Sensing (GIRS) team since June 2024. The team transforms location-based data into actionable intelligence to support innovation across the port. Its work combines advanced analytics, remote sensing technologies, spatial data science, and decision-support solutions with enterprise geospatial systems, data acquisition and integration, and application development. Previously, Ryan served as GIS Coordinator for the Arizona Department of Public Safety and the Arizona Counter Terrorism Information Center. He also served as an All-Source Intelligence Analyst in the U.S. Army.
