

### VIG Transfer Zone / Staging Lane Policy

The Rail-Mounted Gantry (RMG) stack lanes have been designated to give motor carriers and terminal drivers a predictable location for servicing. **Over-the-road drivers will utilize lanes 1-3, while terminal drivers will drop bomb carts in lanes 4 and 5 for de-coupled servicing.** See the image below.

**Effective Monday, June 2, 2025, enforcement will begin. Drivers in violation will be asked to transition to the appropriate lanes.**
